

ALEJANDRO CAÑON MUÑOZ

FULL STACK WEB DEVELOPER

With over a year of hands-on experience crafting single-page applications with React and Redux, I bring a robust skill set encompassing HTML, CSS, and JavaScript, along with a solid understanding of backend technologies. My goal is to collaborate with companies and users, leveraging my expertise to bring their envisioned products to fruition. As a self-taught and quick learner, I am eager to embrace new technologies as needed. Passionate about my work, I am fully dedicated to delivering exceptional results.

MOST RECENT WORK EXPERIENCE

Mitsumichi – Ecommerce

I played a key role in shaping a stunning motorcycle ecommerce platform, offering users a seamless experience to browse, purchase, and leave reviews. Elevating user engagement, the platform boasts an intuitive dashboard empowering administrators to effortlessly manage inventory, banish unwanted elements, curate new motorcycle arrivals, and wield control over reviews.

Github repository: <https://github.com/edgartellom/Mitsumichi>

KEY ACCOMPLISHMENT

- I achieved to make the web totally responsive specially to mobile devices.
- I made a beautiful design with Tailwind and some libraries
- I achieve to build all the shopping logic, like building the shopping cart and managing the stock logic
- I collaborated building the admin dashboard
- I managed all the database of users including its registration with google or local way
- I manage to fixed all bugs that I could find into the frontend and backend code
- I optimize the web simplifying the code and applying best React practices
- I applied semantical code to get a good SEO performance

Dogs project – Web Application

This project was created on my own to show all dogs lovers all the characteristics about dogs such as its weight, height, temperaments, origin, every single dog is being display in a card where you can click on it and

you will be able to see a brief summary with all characteristics that I mention you before, in addition you will could create your own dog to being display in home page
