ALEJANDRO CAÑON MUÑOZ

FULL STACK WEB DEVELOPER

+1 year of experience building single page applications with React and redux, I'm offering my experience and strong understanding in HTML, CSS, JavaScript and knowledges in backend technologies to help to companies or users to achieve the product desired. I'm an autodidact and faster learner so I'm willing to learn new technologies if its required. I enjoy my job and I am really into it.

MOST RECENT WORK EXPERIENCE

Dogs project – Web Application

This project was created on my own to show all dogs lovers al the characteristics about dogs such as its weight, height, temperaments, origin, every single dog is being display in a card where you can click on it and you will be able to see a brief summary with al characteristics that I mention you before, in addition you will could create your own dog to being display in home page

Dogs Web: https://pi-dogs-main-rho.vercel.app/
Github repository: https://github.com/alecanonm/PI-Dogs-main

KEY ACCOMPLISHMENT

- I achieved to make the web totally responsive specially to mobile devices.
- I manage to fixed all bugs that I could find into the frontend and backend code
- I optimize the web simplifying the code and applying best React practices
- I applied semantical code to get a good SEO performance

SKILLS
